REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: None of the prior art of record teaches or suggests the mold locking device of claim 1, wherein the second half-mold has along the edge of its bearing face and over at least most of its height, a radially projecting flange shaped, on its face facing away from the bearing face, as an arc of a circle and able to constitute a rotation surface and said second lock element belongs to one end of a moving part provided with a transverse projecting flange defining a bearing surface in the shape of an arc of a circle facing toward the second hook-shaped lock element and able to bear continuously over the entire height of the rotation surface of the second lock element, whereby, when the mold is closed and locked and subjected to the blowing pressure, the force to which the second half-mold is subjected is reacted, by the moving part, substantially continuously over most of its height via the rotation surface. The closest prior art (Hellmer 4,626,190) discloses a rotating lock member (figure 9), but fails to disclose or suggest the structure of claim 1 listed above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert B. Davis whose telephone number is 571-272-1129. The examiner can normally be reached on Monday-Friday 9-5:30.
